

How To use the Rebrander to create your software application:

Section 1: General Settings

Step #1. Enter the name you would like the application to be called. For instance, if you purchased Coupon Generator, instead of naming it 'Coupon Generator', you can name it 'John's Coupon Generator'.

Step #2. Enter the file name of your choice. For instance, if you enter 'squeezegenerator', the file name will be saved as 'squeezegenerator.exe'

Step #3. Click on the 'Select Skin' button and browse your computer to select the application skin of your choice. (It came with your download)

Step #4. Select the application icon of your choice. (icons are not provided, but you can use your own icon images)

Section 2: Affiliate Settings

This part is for you to enter your affiliate ID for the Software Simple Membership. If you are already a member of our membership site, you will get your affiliate link once you go to the Affiliates Toolbox.

The affiliate link structure look something like this:

`http://softwaresimple.info/index.php?r=YOURID`

The "http://softwaresimple.info/index.php?r=" is already embedded inside the software. What you have to do is to insert your affiliate ID code only, which is the YOURID.

Please do take note that you affiliate ID is unique and can be found inside the members area.

Section 3: Welcome Page

Welcome page is what which will be displayed first when a user opens your software. To add a welcome page, click on the 'Add' button. You'll be able to create your welcome pages with the HTML editor. Once done, just click on the 'OK' button. You can also choose to import a pre-created welcome page HTML file directly if you like.

You can add ONE welcome page. If you do not wish to add any welcome page, you can leave this part blank.

Section 4: Banners

You can add and rebrand your software with up to 3 banners which will be rotated among the top banner spot.

Step #1. To add a banner, first click on the 'Add' button.

Step #2. Enter the banner path. To do that, click on the 'Browse' button and select the banner image from your computer. NOTE: You must select the image from your

computer, and not enter the direct image URL link.

Step #3. Enter the banner URL. This refers to the website link you wish for your banner to link to. This could be your own product link or your affiliate link.

Step #4. Click on the 'OK' button when done. You'll see that your banner details has been added to the banner list.

Step #5. You can add up to 3 banners. To do so, just click on the 'Add' button again after you created the first banner and repeat the above steps.

Section 5: Links

You can add and rebrand your software with up to 4 of text links which will be rotated among the two text links spot.

Step #1. To add a text link, first click on the 'Add' button.

Step #2. Enter the text you wish to be displayed for your text link.

Step #3. Enter the text link URL. This refers to the website link you wish for your text to link to. This could be your own product link or your affiliate link.

Step #4. Click on the 'OK' button when done. You'll see that your text link details has been added to the text links list.

Step #5. You can add up to 4 text links. To do so, just click on the 'Add' button again after you created the first text link and repeat the above steps.

Section 6: Save and Finish

Step #1. Click on the 'Browse' button to select the folder you wish for your extended brander file to be installed to.

Step #2. Select 'Application' as the output type.

Step #3. Click on the 'Create Installer' button. The installation process will take around 15 seconds and you can see the progress via the progress bar. Try not to switch to other programs during the installation process.
